SUMMARY

Full Stack & AI Solutions Developer with 5+ years of experience building scalable web applications, SaaS platforms, and AI-driven systems. Specialized in MERN and MEAN stacks with expertise in React, Next.js, Angular, Node.js, and TypeScript. Experienced in designing high-performance backend architectures, real-time systems, payment integrations, and AI-powered features. Delivered 25+ production-grade platforms including marketplaces, booking systems, AI tools, and automation solutions.

PROFESSIONAL HIGHLIGHTS

Built and delivered 25+ production web applications, including SaaS platforms, marketplaces, and booking systems. Designed scalable backend systems supporting real-time messaging, notifications, and payment workflows. Integrated AI capabilities using OpenAI APIs, automation workflows, and vector search technologies. Implemented integrations with Stripe, PayPal, Twilio, SendGrid, Firebase, and Google APIs. Optimized database performance across MongoDB, PostgreSQL, and MySQL for high-volume applications. Provided technical mentoring and architecture guidance to development teams and freelance clients. Experienced in designing secure authentication systems, role-based access control, and scalable API architectures. Skilled at quickly understanding existing codebases, troubleshooting complex production issues, and delivering stable, maintainable solutions.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Angular, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, REST APIs, WebSockets, Microservices

Databases: MongoDB, PostgreSQL, MySQL, SQL Server, Supabase

Cloud & DevOps: AWS, Docker, CI/CD, Git, GitHub

Integrations: Stripe, PayPal, Twilio, SendGrid, Firebase, Third-party APIs

Authentication & Security: JWT, OAuth, RBAC, Secure API Design

Testing & Docs: Jest, Swagger / OpenAPI

AI & Modern Tools: OpenAI APIs, Lovable.dev, Pinecone Vector Search

KEY PROJECTS

- **Google Business Profile Manager**

Tech Stack: Next.js, Node.js, TypeScript, MongoDB, OpenAI APIs, Google Business APIs

AI-powered SaaS platform that enables businesses to manage Google Business profiles, posts, reviews, and customer messages from a centralized dashboard. The system integrates automation workflows and AI-assisted content generation to streamline customer engagement and improve local business visibility.

- **AI Tutor**

Tech Stack: React, Node.js, MongoDB, OpenAI APIs, Express.js

AI-assisted learning platform that provides intelligent tutoring through structured knowledge bases and subject-specific learning modules. Students can interact with an AI-powered assistant trained on curated educational materials, enabling personalized explanations and subscription-based learning experiences.

- **TouchMe**

Tech Stack: React, React Native, Node.js, MongoDB, WebSockets, Stripe

Real-time social and dating platform designed for global users, featuring swipe-based matching, live chat, video messaging, subscriptions, and marketplace functionality. Built with scalable real-time architecture to support interactive communication and high user engagement.

- **Salon Management Platform**

Tech Stack: React, Node.js, MongoDB, Google APIs, REST APIs

Marketplace-style salon management system where salons can create profiles, showcase services, and manage appointments. The platform supports service listings, booking workflows, and Google Business integrations to improve online visibility and customer engagement.

- **EyeOn Portal**

Tech Stack: React, Node.js, MongoDB, Express.js, RBAC Architecture

Multi-tenant advertising management platform designed for malls to manage digital advertising campaigns across multiple locations. The system enables campaign scheduling, digital display management, and secure role-based access control for administrators and advertisers.

- **Aikyam**

Tech Stack: Angular, Node.js, MySQL, Express.js

Community support platform connecting individuals with essential social services

- **VeriSocial**

Tech Stack: React, Node.js, MongoDB, Stripe, Crypto Payments, REST APIs

Vendor marketplace platform where companies submit products for verification and approval before market release. The system manages vendor onboarding, product evaluation workflows, and payment processing while ensuring transparency and trust in product rating processes.

- **Explrar**

Tech Stack: React, Node.js, MongoDB, Third-Party Travel APIs, REST APIs

Travel booking platform supporting flights, hotels, trips, and activities through integrations with external travel APIs. The system provides a unified interface for searching, comparing, and booking travel services to simplify travel planning for users.

- **Prime Ride Access**

Tech Stack: Angular, Node.js, Firebase, Twilio, REST APIs

Technology-driven platform designed to modernize non-emergency medical transportation services. The system enables efficient ride scheduling, real-time coordination, and communication between patients, transport providers, and healthcare organizations..

EXPERIENCE

Code Babu — Full Stack Developer

Jan 2021 – Dec 2024

Developed scalable MERN and MEAN stack applications across SaaS, booking, and marketplace domains. Built secure REST APIs, implemented real-time features, and integrated multiple third-party services. Designed optimized database architectures, implemented authentication systems with role-based access control, and collaborated with cross-functional teams to deliver high-performance production systems.

Freelance Full Stack Developer

Jan 2022 – Present

Delivered SaaS platforms, marketplaces, and custom web applications for international clients. Provided system architecture consulting, migrated legacy systems to modern MERN stack architectures, and developed custom integrations and automation workflows. Troubleshoot complex production issues and optimized applications for performance, scalability, and reliability.
